## Notes for contributors

### Themes and deadlines

**TA115** will look at the contribution archaeologists can make to climate change responses. Articles should, for example, focus on how archaeology can inform and add value to climate adaptation projects such as peatland restoration, woodland creation, wetland reinstatement, or building modification.

**Deadline: 1 December 2021**

Contributions to *The Archaeologist* are encouraged.

Please get in touch if you would like to discuss ideas for articles, opinion pieces or interviews.

We now invite submission of 100–150-word abstracts for articles on the theme of forthcoming issues. Abstracts must be accompanied by at least three hi-resolution images (at least 300dpi) in jpeg or tiff format, along with the appropriate photo captions and credits for each image listed within the text document. The editorial team will get in touch regarding selection and final submissions.

We request that all authors pay close attention to ClfA house style guidance, which can be found on the website: [www.archaeologists.net/publications/notesforauthors](http://www.archaeologists.net/publications/notesforauthors)

TA is made digitally available through the ClfA website and if this raises copyright issues for any authors, artists or photographers, please notify the editor. Copyright of content and illustrations remain with the author, and that of final design with ClfA. Authors are responsible for obtaining reproduction rights and for providing the editor with appropriate image captions and credits. Opinions expressed in *The Archaeologist* are those of the authors and not necessarily those of ClfA.
