

## AutorInnen

### **Thomas Brüggemann, Dr. Alte Geschichte**

*Head of the AG 'Mobilität', is a Senior Lecturer at the chair in Ancient History at the Martin Luther University Halle-Wittenberg. His main fields of research include the history of the Hellenistic World (focus: Seleucid Empire), colonization movements in the Mediterranean from the Bronze Age to Byzantine times, migration processes and nomadism in the ancient Mediterranean (focus: Near East, Levant, North Africa, Balkans), cultural change and political dominance (Hellenization, Romanization) and Christianization and ancient Christianity. E-Mail: thomas.brueggemann@altertum.uni-halle.de*

### **Maria Hahnekamp, M.A. Ethnologie**

*is a Doctoral Candidate and Research Fellow at the Martin Luther University Halle-Wittenberg. Her Ph.D. thesis deals with the negotiation of side effects caused by the industrial production of Alumina in Fria (Guinea). She is interested how groups, as different as e.g. NGOs, associations, the urban community, employees of the refinery, retired, and people in the periphery justify and legitimize their handling of retirement arrangements, environmental issues and civil society projects between state administration and the multinational operator of the refinery. E-Mail: MariaHahnekamp@gmail.com*

### **Enrico Ille, M.A. Ethnologie**

*is an Assistant Professor at the Institute for Social and Cultural Anthropology, Martin Luther University of Halle-Wittenberg. His research interests include discourses on the past, technologies of representation, organization and development, projections of the future, and food supply chains in Sudan (especially Nuba Mountains). E-Mail: enrico.ille@ethnologie.uni-halle.de*

### **Kirill Istomin, Dr. Ethnologie**

*is a former Senior Research Fellow at the Max Planck Institute for Social Anthropology in Leipzig. His major research interests have been cultural ecology, reindeer husbandry, herding technologies, interactions between reindeer and humans, orientation in space, perception of the environment, land use and mediation of land-use conflicts in Russia, especially Yamal-Nenets Autonomous Okrug and Komi Republic. E-Mail: istomin@eth.mpa.de*

### **Janka Linke, M.A. Sinologie**

*holds a masters degree in China Studies from the University of Leipzig. For her Ph.D. project she conducted fieldwork on the emergence of the caterpillar fungus economy in Qinghai Province (P.R. China). She focuses on the intersection of market and livelihood issues, profit distribution, and risk management on the wholesale caterpillar fungus market in Xining. E-Mail: janka.linke@gmx.de*

**Romina Martin, Dipl. Inform., Dipl. Biol.**

*is a former Research Fellow at the Helmholtz Centre for Environmental Research (UFZ) in Leipzig, with a background in biology and computer science. Her Ph.D. thesis dealt with sustainable range management in drylands and livelihood security of pastoral households (defended January 2013 at the University of Cologne), using social-ecological simulation models. She is further specializing on agent-based models to analyze human decision making on sustainable land use and currently a Research Fellow at the Stockholm Resilience Centre. E-Mail: romina.drees@ufz.de*

**Felix Paetzel, M.A. Politologie**

*earned his masters degree (Master of Arts) in Political Science, Contemporary History and Ethnology from the Martin Luther University Halle-Wittenberg (2012). E-Mail: felix\_paetzel@web.de*
